

Jann/Matt,

I learned today that a bill to increase court fees was introduced yesterday in the House. The bill was developed using the recommendations from the ACCG study group. The difference, however, from the study recommendations is that the legislators opted to adjust the fees using inflation, instead of recommendations that were made based on fees charged for comparable services in other states.

Please pass this information on to the Engage Gwinnett members. As always, I'm glad to answer questions and will keep you updated on the progress of the bill.

Thanks.
